ABOUT US

# A South African software company focused on practical outcomes

Letacom (Pty) Ltd was registered with the Companies and Intellectual Property Commission in November 2023 with a straightforward aim: to give businesses access to well-built, affordable digital solutions without the complexity that often comes with technology projects.

From our registered office in Pretoria, Gauteng, we work with clients across South Africa on websites, custom business software, online stores and learning platforms, and we develop our own digital products and templates.

We sell our own services and products directly to our customers. We do not operate an open marketplace and do not collect payments on behalf of third parties.

WHAT WE DO

# Our services

### Custom Software Development

We design and build web-based business applications, internal portals and data-driven systems tailored to your processes, from discovery and specification through to deployment and handover.

### E-Commerce Platforms

We build online stores that let your business sell its own products, including product management, order handling and integration with your chosen payment gateway account.

### Online Tools & Digital Products

We develop focused online tools such as calculators, booking systems, client portals and productivity utilities, either as custom builds or as Letacom digital products.

### UI/UX Design

We research users, map journeys and design interfaces for websites and applications, producing wireframes, interactive prototypes and design systems ready for development.

### Software Integration

We integrate business systems, third-party APIs and payment gateways, so that your website, accounting, CRM and operational tools share data reliably.

### Website Design & Development

Corporate and marketing websites built with modern frameworks, optimised for speed, search visibility and accessibility, with content you can keep current.

### Learning Management Systems

We implement and customise learning platforms that deliver courses, track learner progress and issue assessments and certificates, for education and workforce training.

### Business Automation

We analyse manual processes such as data capture, approvals, reporting and notifications, and automate them with integrated software workflows that reduce errors and save time.

### Digital Templates & Resources

We create professional digital templates and resources that businesses can adapt and reuse. Ready-made items are listed on our Digital Products page once available for sale.

### Website Maintenance & Technical Support

We keep your digital platforms secure, up to date and running, with scheduled maintenance, content updates, backups and responsive technical support.

HOW WE WORK

# From enquiry to delivery

01

### Enquiry

Tell us what you need through our website, email or telephone.

02

### Quotation

We confirm scope and send a written quotation with timeline and price in ZAR.

03

### Agreement and invoice

You accept the quotation and our terms; we issue an invoice for the deposit.

04

### Delivery

We deliver in agreed milestones, with review and approval at each stage.

COMMITMENTS

# Transparent and responsible

**Payments:** EFT to our business bank account against a formal invoice. Online card payments will be introduced once payment gateway verification is complete.

**Policies:** Published refund and cancellation, delivery, privacy (POPIA) and payment policies at letacom.co.za.

**Ownership:** Custom work transfers to the client on full payment.

**Support:** A warranty period on every project, with optional maintenance plans.
